

An abstract, expressive artwork on a yellow background. It features a large, swirling treble clef in shades of pink, purple, and blue. A white musical note is positioned near the center. Various other musical notes and symbols are scattered throughout, some in blue and orange. The composition is filled with dynamic, sweeping brushstrokes in black, blue, and orange, creating a sense of movement and energy.

The McTell Brothers

Their story.

It all started in 2003 at the tender age of 7, when Jeff and Brian got their first guitars and started lessons. And by the ripe old age of 9 the fraternal twins were already playing open mics in their home state of Virginia.

They bought electric guitars and started mastering the blues — despite not even being double digits in age, and years away from hanging out in bars.

The McTell Brothers have gone on to play with some of country's top songwriters and guitarists from Nashville, Austin, New York and beyond. And they've played some of the top venues and festivals in the mid-Atlantic.

The twins play and sing acoustic and electric blues, rock, folk rock as well as their own compositions.

After 5-years touring as the J & B Blues Project, the 2-brothers felt it was time to embody the eclectic and wide variety of music they enjoy performing, along with their beloved blues. Their new name pays homage to legendary bluesman Blind Willie McTell.

2009 shows.

The McTell Brothers in 2009 toured under their original name.
